An <u>URGENT</u> Security Warning For Businesses Running Windows 10

If your organization is currently running Windows 10 on one or more computers in your office, you need to know about a dangerous security threat to your organization that must be addressed before October 14, 2025. Please take a moment to read this important announcement.

From: Mike Hill
Chief Guru - CEO
MicroNet Technical Solutions
https://micronetkc.com

Dear Colleague,

My name is Mike Hill, Chief Guru - CEO of MicroNet Technical Solutions, and as a Microsoft Partner, we are urgently reaching out to businesses in the Greater Kansas City Metro area using Windows 10 to alert you to a critical security risk to your organization and inform you about what you need to do to protect your company.

Microsoft has officially announced that it will retire support for Windows 10 on October 14, 2025. This means that any computer running Windows 10 will be completely exposed to serious hacker attacks designed to steal your data, crash your system and compromise your business in ways you do NOT want to deal with.

This is such a severe risk that organizations handling sensitive financial or medical information are required by law to upgrade from unsupported operating systems like Windows 10 because firewalls and anti-virus software alone will not be sufficient to protect them (or you).

If you don't want cybercriminals running rampant on your network, you MUST upgrade any systems running Windows 10. And while October 14, 2025, may seem distant, updating your IT infrastructure takes considerable time, so you need to act NOW.

Free Microsoft Risk Assessment And Migration Plan: Discover The Easiest, Most Budget-Friendly Way To Upgrade

As a local Microsoft Partner, my company is committed to helping businesses in the Greater Kansas City Metro area by offering a free Microsoft Risk Assessment and Migration Plan.

At no cost, we'll meet with you and conduct our proprietary Risk Assessment to determine which specific computers and servers will be affected by the Windows 10 end-of-life announcement. We will also assess other security, backup and efficiency factors that could cost you in productivity and dollars.

913-213-0944

After conducting this assessment for hundreds of businesses like yours, I'm confident that we will not only expose potential security risks you weren't aware of but also uncover opportunities to make your business more efficient and productive. We'll also create a customized Migration Plan to help you painlessly upgrade from Windows 10 while:

- Avoiding costly hardware and software expenses: We have developed a solution allowing businesses like yours to upgrade affordably without a massive hit to cash flow.

- Ensuring complete disaster recovery: You'll never have to worry about data loss or excessive downtime due to system failure, human error, or other disasters.

- Reducing IT support costs: We can typically reduce IT expenses while giving your team the flexibility to work securely from anywhere with our cloud-based solutions.

At the very least, you'll gain a third-party security review of your network for free. To claim your Free Risk Assessment and Migration Plan, go to: https://micronetkc.com/cyber-security-assessment/

I also want to assure you that this consultation will not be a "high-pressure" sales meeting but rather an informative discussion designed to arm you with the facts and strategies you need. If you choose to work with us after, great! If not, that's fine too.

I will have Ross Sifford from my office call you next week to ensure you've seen this letter and to schedule your Free Risk Assessment. Please don't procrastinate— upgrading before the deadline ensures you avoid security risks and keeps your business compliant.

Best regards,

Mike Hill, Chief Guru - CEO
MicroNet Technical Solutions

Call me directly with your questions: 913-213-0944

P.S. — *If you're unsure whether you have computers running Windows 10, give us a call. Our assessment can include a full inventory and diagnostic of your systems.*

About Mike Hill

Mike is Chief Guru - CEO of MicroNet Technical Solutions, a Microsoft Partner with over 34 years of experience installing, supporting and securing Microsoft-based IT systems for small to medium businesses in the Greater Kansas City Metro area. For more information about how they can help you solve your IT problems, go to https://micronetkc.com

What Do Our Clients Have To Say About MicroNet Technical Solutions?

We feel our information is secure and protected. MicroNet is pretty vigilant about staying on top of any threats and new technology.

Jessica Stoker, CPA, EA
Managing Partner, Mission Tax KC

I love the fact that I can discuss ideas and bounce things around with a human when we are struggling with technology concepts in our business. The processes are in place to alert them of a problem, and then they stay on it and let us know when it's resolved.

Brian Bock
Owner, Bock's Steam Star

This is an IT firm that is knowledgeable, responsive and cares about you. Your long-term employees and low turnover give us a sense of comfort.

Michael Sharma-Crawford
Co-Owner and Attorney, Sharma-Crawford Attorneys at Law
