

## ENDPOINT CYBERSECURITY SUITE FOR MICROSOFT OFFICE 365

TAKE CONTROL OF YOUR ENDPOINT SECURITY

### Why Us?

Every device connected to your network opens a gateway for cybercriminals to launch devastating attacks. Traditional antivirus tools fall short of detecting these sophisticated threats.

Our comprehensive Endpoint MicroNet Cybersecurity Suite manages and protects your computers with antivirus and sophisticated Endpoint “Threat” Detection and Response software. Additionally, we can backup your computers and/or servers to the cloud

### Risks of modern-day cyberattacks

- Devastating financial loss
- Extended downtime
- Damage to reputation
- Loss of customers
- Regulatory fines

### MicroNet Cybersecurity Framework
